

# Critical Alert for Oxygen

Reducing Patient Stress  
Over Their Medical Oxygen Supply

## Product Description

MIJA's Critical Alert for Oxygen is designed for use by hospitals, healthcare facilities, and home health care providers to ensure their medical Oxygen cylinders are fully charged and are providing a reliable and continuous flow of Oxygen.

Critical Alert eases gas supply anxieties for the patients, as well as for the caregivers responsible for their wellbeing through highly accurate content measurement and empty/full status detection and notification. By filling an important information gap created by standard pressure gauges, Critical Alert alleviates risk and liability, while significantly reducing patient stress.

Critical Alert is safe and easy to install. Comprised of MIJA's highly accurate pressure gauges to display the remaining gas contents, as well as audible and LED visual alarms for cylinder status notification, Critical Alert clearly announces when their Oxygen cylinder needs attention.

## Benefits

- Delivers vital information visually and audibly to clearly indicate current oxygen levels
- Reduces anxiety over current oxygen status
- Compatible with standard medical Oxygen regulators
- Accurate, high-quality gauge and state-of-the-art electronics
- No external power supply required
- Extended battery life
- Alarms indicate when battery is low
